DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 and 11-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Voda (3125517).

Voda teaches an invert emulsion composition comprising the same surfactant as in the present invention, which is used as a drilling fluid (See examples). Applicants claim 10 and specification teaches that the weighting agent may be sodium chloride or calcium carbonate, thus the teaching of the use of seawater or salt water by Voda, or water containing calcium carbonate anticipates the current claims (see column 3, lines 48-60 and column 2, lines 1-4). Applicants discovery of the reversible property does not distinguish over the prior art (In re Tomlinsin 150 USPQ 623).

3. Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Applicant's amendment has distinguished over EP '538 and Bleeker since claim 23 was cancelled, and Mueller which is distinguished by the current surfactant taught in the claims. Applicant did not specifically respond to the rejection over Voda containing sea water, a salt water or specifically containing salts such as sodium chloride. Voda anticipates the present invention by teaching the use of sea water, or sodium chloride or

calcium carbonate containing water as the aqueous phase of the invert emulsion. The double patenting rejection is removed in view of applicant canceling the relevant claims.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
